- 20.4 Exhibitors who rent **stands with fire extinguishers or fire hydrants (see 7.4/1 and 2) shall keep them in a visible spot and provide their easy access.**

- 20.5 **All stands shall provide easy access and displacement for handicapped persons.** For constructions on elevated platforms, **an access ramp shall be mandatory one each side.**

- 20.6 **Stands including mezzanines in their plans shall request the FIT Technical Department the corresponding authorization for their construction. The presentation of a calculation report is mandatory for mezzanines with a minimum resistance of 500 Kg/m2 in order to be approved by La Rural. Non-compliance would cause the disqualification Mezzanine by La Rural. This memory must be signed by a professional enrolled (architect or engineer).**

- 20.7 **In order to be given access to the Fair Premises, stand constructors and assemblers shall have to submit their Workers Compensation Insurance (ART, according to the Spanish acronym), Mandatory Life Insurance and/or Personal Accidents Insurance.**

- 20.8 The assembly concept for the different elements which materialize a stand shall be that of **ASSEMBLING AND NOT THAT OF MANUFACTURING**, that is, stands, furniture, displays, platforms, etc. **shall not be ground, welded or painted with a blowtorch within the Premises**; they shall have to be manufactured in a workshop and then assembled at the fair premises.

- 20.9 **It is absolutely forbidden to leave sharp edges or aluminum rims on stand platforms: their protection with rubber strips or plastic profiles is mandatory.**

21. ELECTRIC INSTALLATIONS

- 21.1 Spaces marketed with **Basic Assembly** include electric installation according to the regulations, for which **FIT** assumes the corresponding technical responsibility.
- 21.2 In spaces where **stands are built according to a project**, the electric installation shall be performed by an **electrician registered with the Instituto de Habilitación y Acreditaciones** (Qualification and Registration Institute), classified according to the following:
Installed power from 0 to 10 kW: LEVEL 3 (Adequate Installer).
Installed power from 11 to 50 kW: LEVEL 2 (Technician).
Installed power exceeding 50 kW: LEVEL 1 (Professional).
At the installation sites, these professionals **shall comply with the "Rules and regulations for the set up of electric installations in real property"** issued by the **Argentine Electro technical Association (AEA)** – September 1996 edition, or the edition that replaces it – and with the indications included in the **"Con-formity Practice"** issued by the same Association.
Additionally, they shall comply with the provisions of the Fair premises before power is supplied; fair authorities reserve the right to refuse to supply power in case the technical conditions are not fulfilled; for instance: the use of parallel cables is forbidden (see 24.2 - g).
- 21.3 **For safety reasons**, a general switch for shutting the stand power supply shall be available to the staff authorized by the Fair in case of eventual incidents. **Access to that switch shall be available 24 hours.**
- 21.4 The exhibitor is provided with a power consumption that amounts to **50 W/h per square meter**, the cost of which is included in the stand value. In case of needing more power (additional power), that shall have to be request based on a simultaneous power use calculation by filling out **Form 1: Technical File**, available at www.fit.org.ar within the term set forth in the **Schedule** and the cost of which shall have to be paid before the beginning of the Exhibition (see 25.5). Due to technical reasons, additional power requests submitted after the term set forth for that purpose shall not be addressed.
- 21.5 **It is absolutely forbidden to make clandestine connections and/or to connect power of a higher voltage** than that requested. Violations shall be punished with the temporary interruption of the power supply, definite interruption or stand closure, according to the **E.C.** judgment.
- 21.6 From a consumption of 20 amps it is necessary to order a three-phase connection, which will be billed at the cost in force at the time of the fair.

22. ASSEMBLY PROHIBITIONS

- 22.1 **Adhering the carpet directly to the pavilion floor.** Carpets shall be affixed with two-face tape or a similar method. The use of contact cement is forbidden.
- 22.2 Painting with **fog-like or spray paint** (using a blowtorch or sprays) or coating with projectable materials which cause the same effect.
- 22.3 **Using masonry materials** or materials of any other kind of wet construction or loose materials (stone chips, crushed stone, sand, sawdust, etc.)
- 22.4 **Causing any kind of deterioration** derived from painting, perforating, nailing, holing, cementing, gluing floors, walls or any other fix installation of the premises and, especially, of the dividing panels. The only materials authorized to be affixed to the dividing panels are **self-adhesive materials**. Damaged panels shall be invoiced to the stand tenant.
- 22.5 **Using any type of heaters** and/or gas or liquid fuel operated devices or any other flammable element. Access with gas tanks to the show pavilions is forbidden.

23. DISASSEMBLY

- 23.1 **Exhibitors shall remove their belongings, disassemble and remove the stand construction elements** and return the space and the elements supplied by the **FIT** (see 25.12) in perfect conditions and within the term set forth in the **Schedule**.
- 23.2 **Should a stand constructor leave any traces of the construction, components, elements, parts, etc. upon disassembly which have to be subsequently removed by the FIT cleaning personnel, the exhibitor shall have to pay a \$2000 (two thousand pesos) fine per square meter.**
- 23.3 The disassembly period shall be that set forth in the

Schedule (see 25.12). During that term, **the exhibitor shall be exclusively responsible for the security of the stand and the elements thereof.**

- 23.4 The exhibitor occupying a basic stand must remove all their belongings within 2 hours of the fair closure on the last day since, after that period, we will proceed to the removal of paneling and furniture, and all material in the stand will be sent to the waste container.

24. CHARGED ADDITIONAL OPTIONAL SERVICES AND REQUESTS

- 24.1 Exhibitors shall be able to request the **E.C.** the following **Charged Additional Services**:
- Additional power supply, by filling out **Form 1: Technical File**, available at www.fit.org.ar within the term set forth in the **Schedule** (see 25.2)
 - Water supply and drainage, by filling out **Form 1: Technical File**, available at www.fit.org.ar within the term set forth in the **Schedule** (see 25.2).
- 24.2 Exhibitors may request information of providers of the following **Charged Optional Services to the FIT E.C.:**

APPENDIX 1 - COVID - FIT 2021 Protocol AUGUST 2021

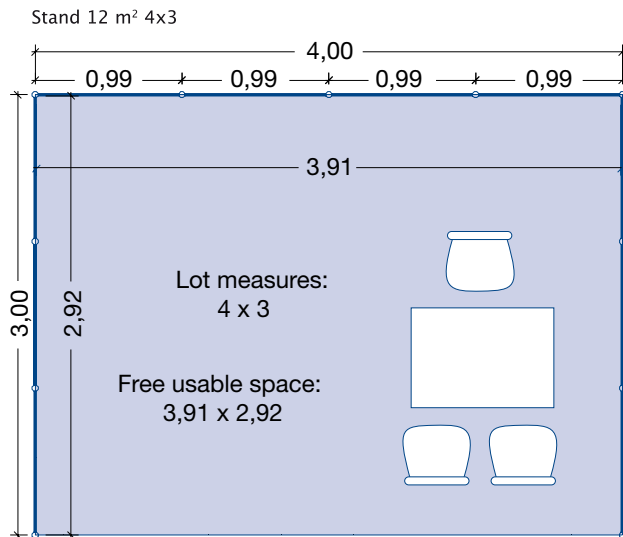

- Inside the booths, the use of masks and the social distance between people of at least 2 m must be respected at all times, and the maximum allowed number of 1 (one) exhibitor per 4 m2 must not be exceeded at any time. It is recommended that a sign be placed in a visible place at each exhibition stand, indicating its maximum capacity or seating capacity. Booth capacity control is the responsibility of the exhibitor.
- Perimeter closures that obstruct air circulation are not permitted. The floor plan of the booths must have minimal furniture. It is recommended to use transparent dividers

for the furniture used in the booths and the personnel assigned to the booth must use the personal protection elements according to protocol. Storage rooms may not have a roof/ceiling and should be accessible only by one person at a time. Stands must be sanitized frequently.

- The distribution of brochures or any other documentation/merchandising by the exhibitor shall be carried out exclusively by authorized personnel of the stand and always at the visitor's request. As far as possible, activations within the booths that promote crowding and contact between visitors should be avoided, while mass gatherings are not permitted. Open-tray tastings are not allowed.
- An agenda must be established for meetings to be held inside the stand in order to avoid crowds. Meetings should have a maximum duration of 30 minutes. Manage and control the number of participants on the exhibition floor (prioritize stand designs and construction methods that tend to reduce set-up and dismantling times). It is recommended to set up a circulation plan for visitors within the stand and in the case of stands larger than 80 m2 it is advisable to differentiate the access and exit areas in order to avoid crowds.
- In meeting rooms and work tables, interpersonal distance of at least 2 m should be guaranteed, masks should be worn at all times and alcohol gels should be used to keep hands clean.
